

CyLumena is CyberLean

# LEAN, SUSTAINABLE, AND MEASURABLE CYBERSECURITY

No organization can afford the downtime and lost revenue security breaches cost. Nor can they bear the erosion of consumer confidence, reputation decline, or threat to company value and stability.

## EXPERIENCE GREATER CYBERSECURITY VALUE IN THREE WAYS

Reduce Cyber Cost Burden

Enhance Risk Visibility

Improve Cyber Resilience

## PROVEN CYBERSECURITY EXPERTISE AND EXPERIENCE FOR FORWARD-THINKING ORGANIZATIONS

You will have access to a broad team of cybersecurity experts, range from former CISOs, Big Four consultants, and U.S. Armed Services Intelligence experts.

We provide strategic security guidance, resources, and tools to prevent cyberattacks and enhance measurable maturity for every organization.

*CyLumena was created out of a growing need for reliable cybersecurity technology, support, and expert guidance.*

*Our mission is to provide clients with peace of mind around cybersecurity through a cost-effective combination of preparation, prevention, and responsive action.*

*The CyLumena security philosophy was born out of the need to address the increasing and complex security requirements of real-world digital technology.*

## MAXIMIZE SECURITY AND VALUE WITH OUR OUTCOMES-BASED, LEAN CYBER APPROACH

CyLumena's unique CyberLean methodology ensures that your cyber controls and solutions have measurable outcomes that yield the highest return to your targeted stakeholders.

# SERVICES

## ASSESSMENT & ADVISORY SERVICES

Many organizations focus all the effort on the most obvious data security risks — phishing, malware, hacking. We believe a more holistic approach is more effective and resilient, including soft targets like current and former employees, physical facility vulnerabilities, and common blind spots lurking in every organization.

Once identified, we help each client prioritize the risk and benefit of remediation, as well as create a plan for how and when those risks will be addressed.

Periodic assessments provide a health check-up to ensure two things — security foci shifts as priorities evolve and previous remediation work continues to provide adequate protection.

Having access to complementary security leadership can guide your organization's infused strategy, approach to governance, as well as high-level planning for realizing the next level of required security.

## MANAGED SERVICES & SOLUTIONS

Security solutions and technology give sound strategies and plans the teeth that they need to make a measurable and positive impact on your security profile. The solutions that we offer give structure and rigor to your program while ensuring that key security capabilities are backed by robust technology.

## CYBERSECURITY RESOURCING

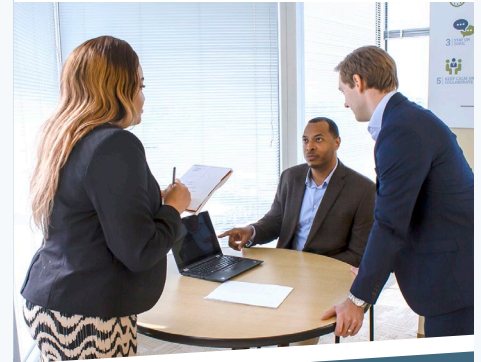

Finding the right security professionals, at the right time, and to fit the need, is becoming increasingly difficult. Our cadre of seasoned leaders and technicians are available as individual contributors, part of a contracted project, or to augment your existing security team.

Whether retained, temporary, or project-oriented, our security leadership brings hard-won experience and proven approaches to creating and maturing data security programs.

### **Who is looking out for your best interest and cybersecurity resilience?**

We can. Contact us and learn how the CyLumena team could enhance and amplify the value that cybersecurity brings to your organization.

## THE PATHWAY TO CYBER MATURITY

*Compliance is not the same as cybersecurity resilience or organizational maturity.*

*You can achieve greater cybersecurity maturity with our help.*

*We will work with you to build the characteristics and capabilities found in the most resilient and secure organizations.*

*Where are you on the cybersecurity maturity continuum?*
